

Native Canine C-Reactive Protein (DAG-WT1182)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Species	Canine
Purity	> 95%
Conjugate	N/A
Applications	N/A
Molecular Weight	20 kDa
Format	Liquid
Size	100 µg
Buffer	50 mM Tris-HCl, pH 7.5, 200 mM NaCl, 2 mM CaCl ₂
Preservative	0.05% sodium azide
Storage	Store at -20°C to -80°C
Ship	Dry ice

BACKGROUND

Introduction	C-reactive protein (CRP) is a protein found in the blood, the levels of which rise in response to inflammation (i.e. C-reactive protein is an acute-phase protein). Its physiological role is to bind to phosphocholine expressed on the surface of dead or dying cells (and some types of bacteria) in order to activate the complement system via the C1q complex. CRP is synthesized by the liver in response to factors released by fat cells (adipocytes). It is a member of the pentraxin
--------------	---

family of proteins. It is not related to C-peptide or protein C. C-reactiveprotein was the first pattern recognition receptor (PRR) to be identified.

Keywords

CRP; C-reactive protein
