

Recombinant Human NSE [His] (DAG-WT1248)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Species	Human
Purity	> 95%
Conjugate	His
Applications	Immunoassays
Molecular Weight	47 kDa
Format	Liquid
Size	100 µg
Buffer	20 mM Tris-HCl, pH 7.5, 100 mM KCl, 5 mM MgSO ₄
Preservative	None
Storage	Store at 20°C

BACKGROUND

Introduction	Neuron-specific enolase (NSE) is an enzyme that is found in the cytoplasm of neurons and neuroendocrine cells. The production of NSE occurs late in neural differentiation, thus making NSE an index of neural maturation. Increased serum levels of NSE may occur in patients with neuroendocrine tumors (NETs).
Keywords	Neuron-specific enolase; NSE
