

# **N. meningitidis serogroup X capsule polysaccharide (CPS) (DAG-WT1353)**

This product is for research use only and is not intended for diagnostic use.

## **PRODUCT INFORMATION**

<b>Conjugate</b>	N/A
<b>Applications</b>	ELISA, CLIA, LF
<b>Format</b>	Liquid
<b>Size</b>	1 mg
<b>Preservative</b>	ProClin 300
<b>Storage</b>	Store at 2-8°C

## **BACKGROUND**

<b>Introduction</b>	Neisseria meningitidis, often referred to as the meningococcus, is a Gram-negative bacterium that can cause meningitis and other forms of meningococcal disease such as meningococcemia, a life-threatening sepsis. The bacterium is referred to as a coccus because it is round, and more specifically a diplococcus because of its tendency to form pairs.
