

Recombinant *N. meningitidis* serogroup B Major outer membrane protein P.IB [His] (DAG- WT1359)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Species	Neisseria meningitidis serogroup B (strain MC58)
Purity	> 85% as determined by SDS-PAGE
Conjugate	His
Applications	ELISA, CLIA, LF
Molecular Weight	37.8 kDa
Format	Liquid or Lyophilized powder
Size	20 µg, 100 µg, 1 mg
Buffer	Tris/PBS-based buffer, 6% Trehalose, pH 8.0
Preservative	None
Storage	Store at -20°C

BACKGROUND

Introduction	Neisseria meningitidis, often referred to as the meningococcus, is a Gram-negative bacterium that can cause meningitis and other forms of meningococcal disease such as meningococcemia, a life-threatening sepsis. The bacterium is referred to as a coccus because it is round, and more specifically a diplococcus because of its tendency to form pairs.
