

PEGylated Recombinant Human Endostatin (DAG-WT1771)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Purity	> 95% as determined by SDS-PAGE
Conjugate	PEG
Applications	Cell culture
Molecular Weight	21 kDa
Format	Lyophilized
Size	1 mg
Preservative	None
Storage	Store at 2°C to 8°C

BACKGROUND

Introduction	Endostatin is a naturally occurring, 20-kDa C-terminal fragment derived from type XVIII collagen. It is reported to serve as an anti-angiogenic agent, similar to angiostatin and thrombospondin. Endostatin is a broad-spectrum angiogenesis inhibitor and may interfere with the pro-angiogenic action of growth factors such as basic fibroblast growth factor (bFGF/FGF-2) and vascular endothelial growth factor (VEGF).
Keywords	PEG; Endostatin
