

Metsulfuron [BSA] (DAG-WT1868B)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Conjugate	BSA
Applications	ELISA, LFIA,
Format	Liquid
Size	1 mg
Buffer	10mM PBS, pH 7.4
Preservative	None
Storage	Store at -20°C
Ship	Wet ice

BACKGROUND

Introduction	Metsulfuron is a herbicide which belongs to the category of sulfonopyrimidines. It works by inhibiting the production of auxins in plants, which leads to the curling and wilting of the foliage. Metsulfuron is widely used to control grasses and other weeds in cereal crops, gardens, lawns, and golf courses. It is important to follow the proper application protocols and guidelines when using metsulfuron to minimize potential risks to human health and the environment.
Keywords	Metsulfuron; Sulfonylurea herbicide
