

## Recombinant Human beta 2-Microglobulin [His] (DAG-WT2159)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

| Species          | Human   |
|------------------|---|
| Purity           | > 95% as determined by SDS-PAGE   |
| Conjugate        | His   |
| Applications     | Immunoassays  |
| Molecular Weight | 12.8 kDa  |
| Format           | Lyophilized   |
| Size             | 100 μg, 500 μg  |
| Buffer           | Lyophilized from 0.22 $\mu$ m filtered solution in PBS (pH 7.4). Normally 5% trehalose is added as protectant before lyophilization |
| Preservative     | None  |
| Storage          | Store at -20°C  |

## **BACKGROUND**

| Introduction | Major regulator of synaptictransmission and plasticity at adult synapses in many regions of the      |
|--------------|--|
|              | CNS. Theversatility of BDNF is emphasized by its contribution to a range of adaptiveneuronal         |
|              | responses including long-term potentiation (LTP), long-termdepression (LTD), certain forms of        |
|              | short-term synaptic plasticity, as well ashomeostatic regulation of intrinsic neuronal excitability. |
| Keywords     | B2M; beta-2-microglobulin  |
