

Recombinant Human Albumin (DAG-WT2241)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Species	Human
Purity	> 95% as determined by SDS-PAGE
Conjugate	N/A
Applications	Immunoassays
Molecular Weight	66.5 kDa
Format	Liquid
Size	50 µg, 500 µg, 1 mg
Buffer	20mM PB, 150mM NaCl, pH7.4
Preservative	None
Storage	Store at -20°C

BACKGROUND

Introduction Human albumin is a protein found in the blood plasma of humans and other mammals. It is produced by liver cells and helps in transportation of drugs, hormones, and essential nutrients throughout the body. Albumin also helps maintain blood volume and pressure. It can be used in medical treatments, such as in the treatment of shock or as a blood substitute. It is also used in cosmetic and beauty treatments.

Keywords Albumin; ALB
