

# Recombinant Human TNF beta (DAG-WT2253)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

Species	Human
Purity	> 95% as determined by SDS-PAGE
Conjugate	N/A
Applications	Immunoassays
Molecular Weight	18.8 kDa
Format	Liquid
Size	50 µg, 500 µg, 1 mg
Buffer	PBS, pH 7.4
Preservative	None
Storage	Store at -20°C

## BACKGROUND

Introduction	TNF beta, also known as tumor necrosis factor-beta, is a cytokine that plays an important role in the immune system. It helps activate immune cells and can trigger fever, inflammation, and other symptoms. TNF beta is often used in the treatment of certain diseases, such as rheumatoid arthritis, inflammatory bowel disease, and leprosy. However, high levels of TNF beta can cause serious side effects and have been linked to various health problems, including cancer and Alzheimer's disease.
Keywords	Lymphotoxin-alpha; TNF beta

# GENE INFORMATION

UniProt ID

P01374
