

## Luteinizing hormone (LH) control (DAG-WT2652)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

<b>Conjugate</b>	Unconjugated
<b>Applications</b>	Immunoassays
<b>Format</b>	Liquid or Lyophilized
<b>Concentration</b>	≥90mIU/mL
<b>Size</b>	0.5 mL, 1.0 mL
<b>Buffer</b>	Synthetic serum
<b>Storage</b>	Store at -20°C

### BACKGROUND

<b>Introduction</b>	Luteinizing hormone is a hormone produced by the anterior pituitary gland. In females, an acute rise of LH called the LH surge triggers ovulation and development of the corpus luteum. In males, where LH had also been called interstitial cell-stimulating hormone (ICSH), it stimulates Leydig cell production of testosterone.
<b>Keywords</b>	Luteinizing hormone; LH
