

Isosorbide dinitrate control (DAG-WT2717)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

| | |
|--------------|-----------------------|
| Conjugate | Unconjugated |
| Applications | Immunoassays |
| Format | Liquid or Lyophilized |
| Size | 0.5 mL, 1.0 mL |
| Buffer | Synthetic serum |
| Storage | Store at -20°C |

BACKGROUND

| | |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Introduction | Isosorbide dinitrate is a medication used for heart failure, esophageal spasms, and to treat and prevent chest pain from not enough blood flow to the heart. It has been found to be particularly useful in heart failure due to systolic dysfunction together with hydralazine. It is taken by mouth or under the tongue. |
| Keywords | Isosorbide dinitrate; ISDN; (3R,3aS,6S,6aS)-hexahydrofuro[3,2-b]furan-3,6-diyl dinitrate |
