

PB-22 [HRP] (DAG-WT355)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Conjugate	HRP
Applications	ELISA
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements
Size	0.5 ml
Buffer	BSA-stabilizing buffer containing a preservative
Storage	4°C short term, -70°C long term. Avoid multiple freeze/thaw cycles

BACKGROUND

Introduction	PB-22 is a designer drug offered by online vendors as a cannabimimetic agent, and detected being sold in synthetic cannabis products in Japan in 2013. PB-22 represents a structurally unique synthetic cannabinoid chemotype, since it contains an ester linker at the indole 3-position, rather than the precedented ketone of JWH-018 and its analogs, or the amide of APICA and its analogs
Keywords	PB-22; Synthetic cannabis; QUPIC
