

## Dimethomorph [OVA] (DAG-WT446)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

|               |                                                                                       |
|---------------|---------------------------------------------------------------------------------------|
| Specificity   | This product is ELISA-paired with CABT-L7803                                          |
| Species       | N/A                                                                                   |
| Conjugate     | OVA                                                                                   |
| Format        | Liquid                                                                                |
| Concentration | Batch dependent - please inquire should you have specific requirements.               |
| Size          | 1 mg                                                                                  |
| Buffer        | 0.01M PBS, pH7.4                                                                      |
| Preservative  | None                                                                                  |
| Storage       | Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles. |

### BACKGROUND

|              |                                                                                                                                                               |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Introduction | Dimethomorph is a fungicide with systemic function. It is used for treating mildew and root rot caused by organisms such as Pythium and Phytophthora species. |
| Keywords     | Dimethomorph; Fungicide; OVA conjugates                                                                                                                       |
