

Recombinant Creatine Kinase MB Antigen (CKMB) (> 99%) (DAG-WT602)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Species	Human
Purity	> 99 % as determined by SDS-PAGE
Conjugate	Unconjugated
Applications	ELISA
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements.
Size	1 mg
Buffer	20 mM tris-HCl, pH 6.8, with 1 mM DTT, and 1 mM EDTA
Preservative	None
Storage	Stored at -70°C. Avoid repeated freezing and thawing

BACKGROUND

Introduction	<p>Creatine Kinase MB consists of a dimer of nonidentical chains. With MM being the major form in skeletal muscle and myocardium, MB existing in myocardium, and BB existing in many tissues, especially brain. Creatine Kinase MB reversibly catalyses the transfer of phosphate between ATP and various phosphogens. The creatine kinase isoenzymes play a central role in energy transduction in tissues with large fluctuating energy demands such as skeletal muscle, heart, brain and spermatozoa.</p>
