

Avian Adenovirus Group III Allantoic Fluid/Inactivated (DAG-WT754)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Species	Avian
Conjugate	N/A
Applications	N/A
Format	Liquid or lyophilized
Size	1 mL
Storage	Store at -20°C

BACKGROUND

Introduction	Aviadenoviruses are adenoviruses that affect birds—particularly chickens, ducks, geese, turkeys and pheasants. There are 15 species in this genus. Viruses in this genus cause specific disease syndromes such as Quail Bronchitis (QB), Egg Drop Syndrome (EDS), Haemorrhagic Enteritis (HE), Pheasant Marble Spleen Disease (MSD), and Inclusion Body Hepatitis (IBH). The most common serogroups are serogroup 1, 2 and 3.
