

MDPV [BSA] (DAG0361)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Conjugate	BSA
Cas.No	687603-66-3
Format	Protein in PBS
Concentration	6.0 mg/ml
Size	1 mg
Preservative	None
Storage	Short Term: Refrigerated; Long Term: Frozen Avoid multiple freeze/thaw cycles

BACKGROUND

Introduction	Methylenedioxypyrovalerone (MDPV) is a psychoactive recreational drug with stimulant properties which acts as a norepinephrine-dopamine reuptake inhibitor (NDRI). It was first developed in the 1960s by a team at Boehringer Ingelheim. MDPV remained an obscure stimulant until around 2004 when it was reportedly sold as a designer drug. Products labeled as bath salts containing MDPV were previously sold as recreational drugs in gas stations and convenience stores in the United States, similar to the marketing for Spice and K2 as incense. Incidents of psychological and physical harm have been attributed to MDPV use.
