

Amitriptyline [HRP] (DAG1019)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Amitriptyline, HRP conjugate
Antigen Description	Tricyclic antidepressants (TCAs) are a group of drugs that contain a characteristic three ringed nucleus structure. They have been used in the treatment of various forms of depression, anxiety disorders, attention deficit hyperactivity disorder and enuresis in children and as an adjunct to analgesics for certain chronic and neuropathic pain syndromes. Whilst therapeutic drug monitoring (TDM) of TCA's is well established in the treatment of depression, TCA overdose remains the most common cause of death from prescription drugs.
Species	N/A
Conjugate	HRP
Format	Concentrate
Size	0.5 ml
Preservative	None
Storage	2-8°C short term, -20°C long term

BACKGROUND

Introduction	Amitriptyline is in a class of drugs called tricyclic antidepressants. Amitriptyline is used to relieve symptoms of depression and also sometimes to treat certain types of pain.
