

## LAAM [HRP] (DAG1125)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

Product Overview	LAAM, HRP conjugate
Antigen Description	Levo- $\alpha$ -acetylmethadol, also known as Levomethadyl acetate, is a synthetic opioid similar in structure to methadone. Methadone and LAAM are opioid agonists used for analgesia and preventing opiate withdrawal. LAAM is a medication therapy for individuals addicted to opiates that provides an alternative to methadone.
Species	N/A
Conjugate	HRP
Format	Concentrate
Size	0.5 ml
Preservative	None
Storage	2-8°C short term, -20°C long term

### BACKGROUND

Introduction	Levomethadyl acetate is indicated as a second-line treatment for the treatment and management of opioid dependence if patients fail to respond to drugs like methadone or buprenorphine.
Keywords	Levomethadyl acetate; Levo Alpha Acetylmethadol; Orlaam
