

Florfenicol Amine [HRP] (DAG1193)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Florfenicol Amine, HRP conjugate
Antigen Description	Florfenicol are broad spectrum antibiotics closely related in structure and activity to chloramphenicol. Florfenicol have similar antibacterial spectra to chloramphenicol but have not been associated with aplastic anaemia. Both drugs have been used for the treatment of infectious diseases in cattle, pigs and poultry. Florfenicol is used extensively in veterinary medicine and it's use in food producing animals could result in potentially harmful concentrations in tissue, organs and milk. The potential risk is reduced by withdrawal of the drug for a fixed period before slaughter, although residual levels may remain.
Species	N/A
Conjugate	HRP
Format	Concentrate
Size	0.5 ml
Preservative	None
Storage	2-8°C short term, -20°C long term

BACKGROUND

Introduction	Florfenicol (marketed by Schering-Plough Animal Health under the trade name Nuflor) is a fluorinated synthetic analog of thiamphenicol.
Keywords	Florfenicol; Florfenicol(N)
