

Tolfenamic Acid [HRP] (DAG1318)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Tolfenamic Acid, HRP conjugate
Antigen Description	Tolfenamic acid belongs to a group of medicines called non-steroidal anti-inflammatory drugs (NSAIDs). It works by blocking the production of a chemical called prostaglandin which the body produces in response to injury or certain diseases. Prostaglandins are responsible for causing swelling, pain and inflammation associated with these conditions. All the medicines in this group reduce inflammation caused by the body's own immune system and are effective pain killers. This particular NSAID is commonly used to treat the symptoms of migraine.
Species	N/A
Conjugate	HRP
Format	Concentrate
Size	0.5 ml
Preservative	None
Storage	2-8°C short term, -20°C long term

BACKGROUND

Introduction	Tolfenamic acid (TA) is one of the class of non-steroidal anti-inflammatory drugs (NSAIDs). NSAIDs are drugs with analgesic, antipyretic and, in higher doses, anti-inflammatory effects. They reduce pain, fever and inflammation.
