

# Recombinant DENV type 4 Capsid Protein [His] (DAG1983)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

<b>Product Overview</b>	C-terminal 6xHis tagged Capsid Protein (Dengue virus 4)(a.a. 1-100)
<b>Species</b>	DENV
<b>Purity</b>	> 95%, based on SDS PAGE
<b>Conjugate</b>	His
<b>Applications</b>	WB standard; antibody ELISA; immunogen.
<b>Format</b>	Liquid
<b>Size</b>	100 µg, 1 mg
<b>Buffer</b>	PBS with 8M Urea
<b>Preservative</b>	None
<b>Storage</b>	2-8°C short term, -20°C long term

## BACKGROUND

<b>Introduction</b>	Dengue virus (DENV) is one of four serotypes that cause dengue fever. It is a mosquito-borne single positive-stranded RNA virus of the family Flaviviridae; genus Flavivirus. All four serotypes can cause the full spectrum of disease. Its genome is about 11000 bases that codes for three structural proteins, capsid protein C, membrane protein M, envelope protein E; seven nonstructural proteins, NS1, NS2a, NS2b, NS3, NS4a, NS4b, NS5; and short non-coding regions on both the 5' and 3' ends. Further classification of each serotype into genotypes often relates to the region where particular strains are commonly found or were first found.
