

Recombinant *C. elegans* Synaptosomal-associated Protein 25 (DAG2427)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	C.elegans Recombinant, expressed in E.coli. SNAP-25 gene was amplified by PCR from C.elegans and cloned into an E. coli expression vector. SNAP-25 was purified by using conventional chromatography techniques.
Species	C. elegans
Purity	Protein
Conjugate	Unconjugated
Applications	ELISA; PAGE
Concentration	1.0 mg/ml
Buffer	Liquid. In 20 mM Tris-HCl buffer (pH 7.5) containing 0.1 M NaCl
Preservative	None
Storage	2-8°C short term, -20°C long term

BACKGROUND

Introduction	Caenorhabditis elegans is a free-living, transparent nematode (roundworm), about 1 mm in length, which lives in temperate soil environments. Research into the molecular and developmental biology of C. elegans was begun in 1974 by Sydney Brenner and it has since been used extensively as a model organism.
Keywords	Caenorhabditis elegans; C. elegans; Caenorhabditis; Rhabditidae; bA416N4.2 protein; dJ1068F16.2 protein; FLJ23079 protein; resistance to inhibitors of cholinesterase 4 homol; RIC-
