

Cocaine [BSA] (DAG3198)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Cocaine, BSA-conjugated
Species	N/A
Conjugate	BSA
Applications	Immunogen
Format	Liquid
Concentration	5.8 mg/mL
Size	1 mg
Buffer	Supplied in distilled water
Preservative	0.01% Sodium Azide
Storage	2-8°C short term, -20°C long term

BACKGROUND

Introduction Benzoyllecgonine is the compound tested for in most substantive cocaine urinalyses. It can be found in the urine for considerably longer than the cocaine itself which is generally cleared out within 5 days. It is formed in the liver by the metabolism of cocaine, catalysed by carboxylesterases, and subsequently excreted in the urine.

Keywords Cocaine; Benzoylmethylecgonine
