

# Auxin (Indole-3-Acetic Acid) [BSA] (DAG3643)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

Product Overview	Auxin (Indole-3-Acetic Acid), BSA-Conjugated
Species	N/A
Conjugate	BSA
Applications	Immunohistochemistry, immunocytochemistry, The optimal concentration should be determined by the user for each specific application
Size	1 mg
Preservative	None
Storage	2-8°C short term, -20°C long term

## BACKGROUND

Introduction	Indole-3-acetic acid, also known as IAA, is a hetero- cyclic compound that is a phytohormone called auxin. This colourless solid is native plant compound, potent and the most important auxin. The molecule is derived from indole, containing a carboxymethyl group (acetic acid).
Keywords	Auxin (Indole-3-Acetic Acid); Auxin; heteroauxin; IAA
