

Microcystin-LR ($\geq 95\%$) (DAGA-016)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Purity	$\geq 95\%$
Conjugate	N/A
Cas.No	101043-37-2
Applications	Immunoassays
Molecular Weight	995.2 g/mol
Stability	≥ 2 years
Format	Solid
Size	1 mg
Preservative	None
Storage	Store at -20°C

BACKGROUND

Introduction	Microcystin-LR (MC-LR) is a toxin produced by cyanobacteria. It is the most toxic of the microcystins. It has a role as a bacterial metabolite, an EC 3.1.3.16 (phosphoprotein phosphatase) inhibitor, a xenobiotic and an environmental contaminant.
Keywords	Cyanoginosin LR;Microcystin LR
