

## Sheep IgG [Biotin] (DAGA-3125)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

**Product Overview** Immunoglobulin G (IgG) are antibody molecules. Each IgG is composed of four peptide chains - two heavy chains and two light chains. Each IgG has two antigen binding sites. Other Immunoglobulins may be described in terms of polymers with the IgG structure considered the monomer. IgG constitutes 75% of serum immunoglobulins in humans. IgG molecules are synthesized and secreted by plasma B cells.

<b>Conjugate</b>	Biotin
------------------	--------

<b>Applications</b>	User optimized
---------------------	----------------

<b>Format</b>	Supplied in liquid form in a buffered stabilizer solution containing 50% (v/v) glycerol.
---------------	--

<b>Concentration</b>	Batch dependent - please inquire should you have specific requirements.
----------------------	---

<b>Size</b>	100 µg
-------------	--------

<b>Storage</b>	Store at 2-8 centigrade.
----------------	--------------------------
