

Human IgG protein (Fab'2) [HRP] (DAGA-3148)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Purity Human IgG protein (Fab'2) (HRP) was purified by delipidation, salt fractionation and ion exchange chromatography followed by papain digestion and dialysis. Conjugate HRP Applications User optimized Format Lyophilized from 0.01M Na3PO4, pH 7.4, with 0.14M NaCl, 10 mg/ml BSA. Immunoglobulin and protease free. Concentration Batch dependent - please inquire should you have specific requirements. Size 1 mg Storage Store at 4 centigrade until reconstitution. Following reconstitution aliquot and freeze at -20 centigrade for long term storage. Avoid repeated freeze/thaw cycles.	Product Overview	Human Immunoglobulin G protein (Fab'2) (HRP)
Applications User optimized Lyophilized from 0.01M Na3PO4, pH 7.4, with 0.14M NaCl, 10 mg/ml BSA. Immunoglobulin and protease free. Concentration Batch dependent - please inquire should you have specific requirements. Size 1 mg Storage Store at 4 centigrade until reconstitution. Following reconstitution aliquot and freeze at -20	Purity
