

# Recombinant HGV Core Antigen (DAGA-373)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

<b>Antigen Description</b>	GB virus C (GBV-C), formerly known as hepatitis G virus (HGV) and also known as HPgV is a virus in the Flaviviridae family and a member of the Pegivirus genus, is known to infect humans, but is not known to cause human disease. There have been reports that HIV patients coinfected with GBV-C can survive longer than those without GBV-C, but the patients may be different in other ways. There is current active research into the virus' effects on the immune system in patients coinfected with GBV-C and HIV.
<b>Purity</b>	>90%
<b>Conjugate</b>	TBD
<b>Applications</b>	The product is well suited for ELISA/CLIA/LF. For in vitro diagnostic use only
<b>Molecular Weight</b>	45 KD
<b>Format</b>	Liquid
<b>Concentration</b>	Batch dependent - please inquire should you have specific requirements.
<b>Size</b>	1 mg
<b>Buffer</b>	250mM Glycine +25mM Tris-HCl +1% SDS
<b>Preservative</b>	None
<b>Storage</b>	Store at 2-8°C and at -20°C for long-term storage. Don't repeated freeze-thaw

## BACKGROUND

<b>Keywords</b>	HGV core antigen;HGV;HGV core;GB virus C;GBV-C
