

Glucose oxidase (DAGA-460)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Aspergillus niger is a fungus and one of the most common species of the genus Aspergillus. It causes a disease called black mould on certain fruits and vegetables such as grapes, apricots, onions, and peanuts, and is a common contaminant of food. It is ubiquitous in soil and is commonly reported from indoor environments, where its black colonies can be confused with those of Stachybotrys (species of which have also been called "black mould").
Purity	Purified
Conjugate	Unconjugated
Applications	Controls, Calibrators & Standards Clinical Chemistry Testing/Assay Validation
Format	Lyophilized
Concentration	Batch dependent - please inquire should you have specific requirements
Size	100 kIU, 1000 kIU
Buffer	5 mg/mL in 0.1 M potassium phosphate buffer, pH 7.0
Preservative	None
Storage	-20°C

BACKGROUND

Keywords	Aspergillus niger;black mould;Aspergillus niger antigen;Aspergillus niger protein
