

Recombinant SARS Spike Protein (Middle section) (DAGA-605)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	E.coli derived recombinant. The protein contains the middle section of the Spike protein immunodominant regions
Purity	>95% by SDS-PAGE
Conjugate	TBD
Applications	Antigen in ELISA and Western blots, excellent antigen for detection of SARS with minimal specificity problems
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements
Size	1 mg
Buffer	25 mM Tris-HCl, 0.4% sarcosyl, 0,25% Triton -100, 50% glycerol.
Preservative	None
Storage	Protein is shipped at ambient temperature. Upon arrival, store at -20°C
