

Prostatic acid phosphatase (>98%) (DAGA-781)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Prostatic acid phosphatase (PAP), also prostatic specific acid phosphatase (PSAP), is an enzyme produced by the prostate. It may be found in increased amounts in men who have prostate cancer or other diseases. The highest levels of acid phosphatase are found in metastasized prostate cancer.
Purity	>98% by SDS-PAGE
Conjugate	Unconjugated
Applications	Controls, Calibrators & StandardsImmunoassaysClinical ChemistryTesting/Assay ValidationLife ScienceELISA, Blotting, Etc.Tumor Markers
Molecular Weight	100 kDa
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements
Size	10 kU
Preservative	None
Storage	-20°C

BACKGROUND

Keywords Acid Phosphatase protein;Prostatic Acid Phosphatase protein;PAP antigen
