

## **Human creatine kinase (DAGA-836)**

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

Antigen Description	CreatineKinase MB consists of a dimer of nonidentical chains. With MM being the majorform in

skeletal muscle and myocardium, MB existing in myocardium, and BBexisting in many tissues, especially brain. Creatine Kinase MB reversiblycatalyses the transfer of phosphate between ATP and various phosphogens. Thecreatine kinase isoenzymes play a central role in energy transduction intissues with large fluctuating energy demands such as skeletal muscle,

heart, brain and spermatozoa.

Purity	100% by Invitrogen NuPAGE & Sebia CK electrophoresis
--------	--

Conjugate Unconjugated

Format Liquid

**Concentration** Batch dependent - please inquire should you have specific requirements

**Preservative** 0.1% Sodium Azide

Storage 2-8°C

## **BACKGROUND**

**Keywords** CKB;creatine kinase;brain;CKBB;creatine kinase B-type;creatine kinase-B;creatine kinase B

chain; B-CK
