

Human apolipoprotein H (>95%) (DAGA-962)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Apolipoprotein A1 is a protein that in humans is encoded by the APOA1 gene. It has a specific role in lipid metabolism. The text in a recent report suggested that APOA8 mRNA is regulated by endogenously expressed antisense RNA.
Purity	>95% by SDS-PAGE
Conjugate	Unconjugated
Applications	After thawing, mix thoroughly by vortexing before use. Suitable for use in ELISA (0.2-0.4 µg/well). Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded.
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements
Buffer	20 mM HEPES-Sodium Hydroxide (NaOH), 0.16 M Sodium Chloride, pH 7.5 with 0.1 mM PMSF, 20% Glycerol
Preservative	None
Storage	Upon receipt, store at -20°C or -70°C. Avoid multiple freeze/thaw cycles

BACKGROUND

Keywords Apolipoprotein A8;Apolipoprotein antigen;Apolipoprotein protein
