

Recombinant Inhibin B Antigen [His] (DAGC129)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Species	Human
Purity	>90%
Conjugate	His
Applications	ELISA
Format	Liquid
Size	1 ml
Buffer	20 mM Phosphate Buffer, pH 7.4 with 0.01% SDS
Preservative	None
Storage	Short Term: 2-8°C. Long Term: ≤-70°C

BACKGROUND

Introduction	Inhibins are heterodimeric protein hormones secreted by granulosa cells of the ovary in females and Sertoli cells of the testis in males. Inhibins selectively suppress the secretion of pituitary follicle-stimulating hormone (FSH) and also have local paracrine actions in the gonads. The inhibins consist of a dimer of 2 homologous subunits, an alpha subunit and either a beta A or beta B subunit, to form inhibin A and inhibin B, respectively.
Keywords	INHB; inhibin; INHBB; Inhibin B
