

# Recombinant Inhibin B Antigen (DAGC130)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

Species	Human
Purity	>95% by SDS-PAGE
Conjugate	Unconjugated
Applications	ELISA, LFIA, CLIA
Format	Liquid
Size	1 mg
Buffer	10 mM Phosphate Buffered Saline, pH 7.4
Preservative	0.02% Proclin 300
Storage	Store at -20°C or below.

## BACKGROUND

Introduction	Inhibins are heterodimeric protein hormones secreted by granulosa cells of the ovary in females and Sertoli cells of the testis in males. Inhibins selectively suppress the secretion of pituitary follicle-stimulating hormone (FSH) and also have local paracrine actions in the gonads. The inhibins consist of a dimer of 2 homologous subunits, an alpha subunit and either a beta A or beta B subunit, to form inhibin A and inhibin B, respectively.
Keywords	INHBB; inhibin; INHB; Inhibin B
