

## Biotinylated Recombinant Human ACE2 Protein [His] (DAGC241)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

85.1 kDa.  Endotoxin < 1.0 EU per ug protein as determined by the LAL method.  Format Lyophilized  Size 20 μg  Buffer Lyophilized from sterile 20mM PB, 150mM NaCl, pH 7.0, 5% glycerol. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.  Preservative None  Storage Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.	Product Overview	A DNA sequence encoding the human ACE2 (NP_068576.1) (Met1-Ser740) was expressed with a polyhistidine tag at the C-terminus. The purified protein was biotinylated in vitro.
Conjugate       His         Applications       SDS-PAGE, ELISA         Predicted N terminal       Gln 18         Molecular Weight       The recombinant human ACE2 consists of 734 amino acids and predicts a molecular mates 85.1 kDa.         Endotoxin       < 1.0 EU per ug protein as determined by the LAL method.         Format       Lyophilized         Size       20 μg         Buffer       Lyophilized from sterile 20mM PB, 150mM NaCl, pH 7.0, 5% glycerol. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.         Preservative       None         Storage       Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.	Species	Human
Applications       SDS-PAGE, ELISA         Predicted N terminal       Gln 18         Molecular Weight       The recombinant human ACE2 consists of 734 amino acids and predicts a molecular ma 85.1 kDa.         Endotoxin       < 1.0 EU per ug protein as determined by the LAL method.	Purity	> 95 % as determined by SDS-PAGE.
Predicted N terminal       Gln 18         Molecular Weight       The recombinant human ACE2 consists of 734 amino acids and predicts a molecular man 85.1 kDa.         Endotoxin       < 1.0 EU per ug protein as determined by the LAL method.	Conjugate	His

ambient temperature.

Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise.

## **BACKGROUND**

## Introduction

Angiotensin-converting enzyme 2 (ACE2) is also known as ACEH (ACE homolog), is an integral membrane protein with considerable homologous to ACE, which belongs to the peptidase M2 family. ACE2 is an exopeptidase that catalyses the conversion of angiotensin I to the nonapeptide angiotensin, or the conversion of angiotensin II to angiotensin 1-7. ACE2 may be an important regulator of heart function. In case of human coronaviruses SARS and HCoV-NL63 infections, ACE-2 serve as functional receptor for the spike glycoprotein of both coronaviruses. ACE2 is activated by chloride and fluoride, but not bromide and Inhibited by MLN-4760, cFP\_Leu, and EDTA, but not by the ACE inhibitors linosipril, captopril and enalaprilat. ACE2 is active from pH 6 to 9, and the optimum pH is 6.5 in the presence of 1 M NaCI.

Keywords

ACE2; ACHE; ACE-2
