

## GaHV-1 (Cover) Antigen (DAGC556)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

<b>Species</b>	GaHV
<b>Conjugate</b>	Unconjugated
<b>Applications</b>	Can be used for applications such as agar gel immunodiffusion, HI, VN, SN and many others.
<b>Format</b>	Antigen Concentrate
<b>Size</b>	1 ml
<b>Preservative</b>	None
<b>Storage</b>	Store at -20°C.

### BACKGROUND

<b>Introduction</b>	Gallid alphaherpesvirus 1 (GaHV-1) is a species of virus in the order Herpesvirales, family Herpesviridae, subfamily Alphaherpesvirinae, and genus Iltovirus. Originally recognised in chickens in the United States in 1926, this virus causes avian infectious laryngotracheitis (abbreviated as AILT, ILT, or LT), a potentially fatal, economically deleterious disease, widely recognised as one of the most contagious diseases in the poultry industry. The virus and its associated disease also occur in pheasants.
<b>Keywords</b>	GaHV-1; Infectious Laryngotracheitis; Gallid alphaherpesvirus 1
