

Cotinine-3 [BSA] (DAGF-190K)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	N/A
Species	N/A
Conjugate	BSA
Applications	ELISA
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements
Size	1 mg
Buffer	0.05M Triscontaining protein stabilizers.
Preservative	0.005% Thimerosal and other additives
Storage	Long Term: -20°C. Avoid repeated freezing and thawing.
Ship	Wet ice

BACKGROUND

Introduction	Cotinine is a chemical derived from the catabolism of nicotine, which is found in cigarette smoke. Since cotinine can be made only from nicotine, and since nicotine enters the body with cigarette smoke, cotinine measurements can show how much cigarette smoke enters the body in a given time. Cotinine itself is not harmful.
