

Armenian Hamster IgG Isotype Control (DAGIC560)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	This antibody was chosen as an isotype control after screening on a variety of resting, activated, live and fixed mouse, rat and human tissues.
Immunogen	Trinitrophenol + KLH
Isotype	IgG
Source/Host	Armenian Hamster
Species Reactivity	N/A
Clone	IUL999
Purification	Affinity chromatography
Conjugate	Unconjugated
Applications	FC, ICFC, WB, IP, ICC, IF, FA
Preparation	The immunoglobulin was purified by affinity chromatography.
Format	Liquid
Concentration	0.5 mg/ml
Size	500 µg
Buffer	Phosphate-buffered solution, pH 7.2
Preservative	0.09% Sodium Azide

Storage

The antibody solution should be stored undiluted between 2°C and 8°C and protected from prolonged exposure to light. Do not freeze.

BACKGROUND

Introduction

Isotype controls are primary antibodies that lack specificity to the target, but match the class and type of the primary antibody used in the application. Isotype controls are used as negative controls to help differentiate non-specific background signal from specific antibody signal. Depending upon the isotype of the primary antibody used for detection and the target cell types involved, background signal may be a significant issue in various experiments.
