

Thyroxine protein [BSA] (DAGPY3T)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	The thyroid hormones, thyroxine (T4) and triiodothyronine (T3), are tyrosine-based hormones produced by the thyroid gland primarily responsible for regulation of metabolism. An important component in the synthesis of thyroid hormones is iodine. The major form of thyroid hormone in the blood is thyroxine (T4), which has a longer half life than T3.
Species	Human
Conjugate	BSA
Reconstitution	Reconstitute with distilled water, or suitable buffer of your choice.
Format	Lyophilised powder
Concentration	Batch dependent - please inquire should you have specific requirements.
Size	25 mg
Preservative	None
Storage	Aliquot and store at -20 °C. Avoid repeated Freeze/Thaw cycles

BACKGROUND

Keywords T4;Thyroxine;Thyroxine (total T4);total T4
