PRODUCT INFORMATION

Product Overview	Mouse monoclonal to Bcl-2, prediluted
Antigen Description	Suppresses apoptosis in a variety of cell systems including factor-dependent lymphohematopoietic and neural cells. Regulates cell death by controlling the mitochondrial membrane permeability. Appears to function in a feedback loop system with caspases. Inhibits caspase activity either by preventing the release of cytochrome c from the mitochondria and/or by binding to the apoptosis-activating factor (APAF-1).
Specificity	This antibody is specific for the human Bcl-2 oncoprotein in normal and abnormal tissues.
Immunogen	Synthetic peptide corresponding to Human Bcl-2 aa 41-54 (C terminal). Sequence: GAAPAPGIFSSQPGC
