This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Mouse monoclonal to Bcl-2 (FITC)
Antigen Description	Suppresses apoptosis in a variety of cell systems including factor-dependent lymphohematopoietic and neural cells. Regulates cell death by controlling the mitochondrial membrane permeability. Appears to function in a feedback loop system with caspases. Inhibits caspase activity either by preventing the release of cytochrome c from the mitochondria and/or by binding to the apoptosis-activating factor (APAF-1).
Immunogen	Synthetic peptide corresponding to Human Bcl-2 aa 41-54. Sequence: GAAPAGIFSSQPG
Isotype	IgG1
Source/Host	Mouse
Species Reactivity	Human
Clone	Cdm3/211
Purification	This Antibody is conjugated with R-Phycoerythrin (PE) under optimum conditions. The conjugate antibody is purified by size-exclusion chromatography and adjusted for direct use.
