

Anti-*C. trachomatis* LPS Monoclonal antibody, Clone D85 (DCABY-027)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	Reacts with the following serovars: A, B, Ba, C, D, E, F, G, H, I, J, K, L1, L2 and L3.
Target	<i>C. trachomatis</i> LPS
Immunogen	Native, L2 EBs mixture
Isotype	IgG2a
Source/Host	Mouse
Species Reactivity	<i>C. trachomatis</i>
Clone	D85
Conjugate	Unconjugated
Applications	ELISA
Preparation	Purified IgG prepared by affinity chromatography on Protein A
Format	Purified IgG - liquid
Size	200 µg
Buffer	Phosphate buffered saline
Preservative	None
Storage	Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation

before use.

BACKGROUND

Introduction

C. trachomatis is an obligate intracellular pathogen and can cause numerous disease states in both men and women. Both sexes can display urethritis, proctitis, trachoma, and infertility. The bacterium can cause prostatitis and epididymitis in men. In women, cervicitis, pelvic inflammatory disease (PID), ectopic pregnancy, and acute or chronic pelvic pain are frequent complications. *C. trachomatis* is also an important neonatal pathogen, where it can lead to infections of the eye (trachoma) and pulmonary complications.
