

User's Manual

Human ALP(Alkaline Phosphatase) ELISA Kit

REF

DEIA-NS2307-52

96T

RUO

This product is for research use only and is not intended for diagnostic use.

For illustrative purposes only. To perform the assay the instructions for use provided with the kit have to be used.

PRODUCT INFORMATION

Intended Use

ALP ELISA Kit allows for the in vitro quantitative determination of ALP concentrations in serum, plasma, tissue homogenates and other biological fluids.

Storage

2-8 °C for 6 months

Typical Standard Curve

Precision

Intra-Assay: CV<8%

Inter-Assay: CV<10%

Detection Range

3.125-200ng/ml

Sensitivity

< 1.875ng/ml

Linearity

The linearity of the kit was assayed by testing samples spiked with appropriate concentration of ALP and their serial dilutions. The results were demonstrated by the percentage of calculated concentration to the expected.

Sample	1:2	1:4	1:8
serum(n=5)	85-96%	93-105%	86-103%
EDTA plasma(n=5)	84-101%	85-99%	82-100%
heparin plasma(n=5)	80-100%	80-99%	83-96%

Recovery

Matrices listed below were spiked with certain level of ALP and the recovery rates were calculated by comparing the measured value to the expected amount of ALP in samples.

Matrix	Recovery range(%)	Average(%)
serum(n=5)	86-101	92
EDTA plasma(n=5)	86-102	93
heparin plasma(n=5)	89-101	94
