Human CPP(Copeptin) ELISA Kit

DEIA-NS2307-86

96T

This product is for research use only and is not intended for diagnostic use.

For illustrative purposes only. To perform the assay the instructions for use provided with the kit have to be used.

PRODUCT INFORMATION

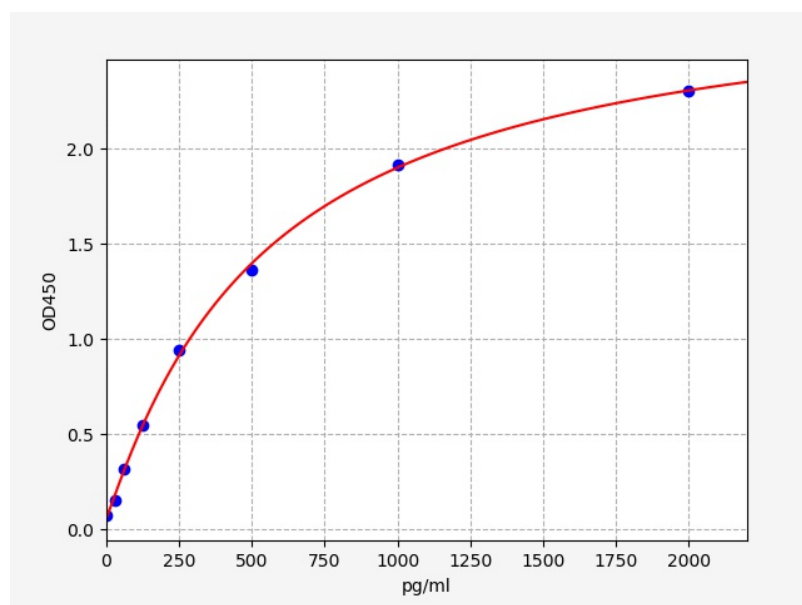

Intended Use

CPP ELISA Kit allows for the in vitro quantitative determination of CPP concentrations in serum, plasma, tissue homogenates and other biological fluids.

Storage

2-8 °C for 6 months

Typical Standard Curve

Precision

Intra-Assay: CV<8%

Inter-Assay: CV<10%

Detection Range

31.25-2000pg/ml(1.56-100pmol/L)

Sensitivity

< 18.75pg/ml

Linearity

The linearity of the kit was assayed by testing samples spiked with appropriate concentration of CPP and their serial dilutions. The results were demonstrated by the percentage of calculated concentration to the expected.

Sample	1:2	1:4	1:8
serum(n=5)	85-103%	86-101%	86-102%
EDTA plasma(n=5)	86-101%	82-97%	85-97%
heparin plasma(n=5)	89-94%	84-99%	83-97%

Recovery

Matrices listed below were spiked with certain level of CPP and the recovery rates were calculated by comparing the measured value to the expected amount of CPP in samples.

Matrix	Recovery range(%)	Average(%)
serum(n=5)	87-102	93
EDTA plasma(n=5)	85-103	95
heparin plasma(n=5)	85-104	94
