## PRODUCT INFORMATION

### Intended Use

This EV-71 IgM DOT-ELISA is an enzyme-linked immuno-filtration method for qualitative determination of IgM-class antibodies to human enterovirus-71 (EV71) in serum or plasma samples. The assay is intended to be used in clinical laboratories for early diagnosis and management of patients related to infection with EV71.

### Storage

Store the kit reagents at 2-8°C. Avoid repeated thawing and freezing. For more detailed information, please download the following document on our website.
