PRODUCT INFORMATION

Intended Use

The Human SDF-1beta (Stromal cell-derived factor-1 beta) ELISA (Enzyme-Linked Immunosorbent Assay) kit is an in vitro enzyme-linked immunosorbent assay for the quantitative measurement of Human SDF-1beta in serum, plasma (Human SDF-1beta concentration is pretty low in normal serum/plasma, it may not be detected in this assay), cell culture supernatants and urine.

Storage

May be stored for up to 6 months at 2-8°C from the date of shipment. Standard (recombinant protein) should be stored at -20°C or -80°C (recommended at -80°C) after reconstitution. Opened Microplate Wells or reagents may be stored for up to 1 month at 2-8°C. Return unused wells to the pouch containing desiccant pack, reseal along entire edge.

Note: the kit can be used within one year if the whole kit is stored at -20°C. Avoid repeated freeze-thaw cycles. For more detailed information, please download the following document on our website.

Sensitivity

35 pg/mL
