PRODUCT INFORMATION

Intended Use

Noradrenalin (Norepinephrine) ELISA is for the quantitative determination of noradrenalin (norepinephrine) in human plasma and urine.

Storage

The kit is shipped at ambient temperature and should be stored at 2-8°C. Keep away from heat or direct sun light. The storage and stability of specimen and prepared reagents is stated in the corresponding chapters. The microtiter strips are stable up to the expiry date of the kit in the broken, but tightly closed bag when stored at 2-8°C. For more detailed information, please download the following document on our website.
