PRODUCT INFORMATION

Intended Use

beta2-Glycoprotein I ELISA is a solid phase enzyme immunoassay employing native β 2-glycoprotein I highly purified from human plasma for the separate quantitative and qualitative detection of IgG and/or IgM antibodies against β 2-glycoprotein I in human serum.

Storage

Store all reagents and the microplate at 2-8°C/35-46°F, in their original containers. Once prepared, reconstituted solutions are stable for 1 month at 4°C/39°F, at least. Reagents and the microplate shall be used within the expiry date indicated on each component, only. Avoid intense exposure of TMB solution to light. Store microplates in designated foil, including the desiccant, and seal tightly. For more detailed information, please download the following document on our website.

Detection Range

0-300 U/mL

Sensitivity

1.0 U/mL
