E-Cadherin ELISA Kit

DIA-XYA142

96T

This product is for research use only and is not intended for diagnostic use.

For illustrative purposes only. To perform the assay the instructions for use provided with the kit have to be used.

PRODUCT INFORMATION

Intended Use

The Human E-Cadherin ELISA Kit contains the components necessary for quantitative determination of natural or recombinant Human E-Cadherin concentrations within any experimental sample including cell lysates, serum and plasma.

Storage

4°C/6 Months

Typical Standard Curve

Detection Range

188-12000 pg/mL

Sensitivity

The Human E-Cadherin ELISA Kit allows for the detection and quantification of endogenous levels of natural and/or recombinant Human E-Cadherin proteins within the range of 188-12000 pg/mL.

Specificity

The Human E-Cadherin ELISA is capable of recognizing both recombinant and naturally produced Human E-Cadherin proteins. The antigens listed below were tested at 60 ng/mL and exhibited less than 2% cross-reactivity.

Mouse: E-Cadherin

The antigens listed below were tested at 120 ng/mL and did not exhibit significant cross-reactivity or interference.

Human: N-Cadherin, P-Cadherin, VE-Cadherin

Mouse: P-Cadherin
